

To Vermont Elected Leaders:

This is definitely a time for Vermonters to come together to do all we can to support and protect frontline workers who are making it possible for life to go on for the rest of us. It's also a time to guard against those who would use this crisis as leverage to win policies that could harm public health and the environment.

I urge you as an elected state leader to oppose any proposal to start sending recyclable material (glass, metal, paper and plastic) to a landfill. Please also oppose proposals that would delay the implementation of Vermont's ban on putting compostable food scraps in the waste stream – a requirement that was passed into law eight years ago. This is a time to come together, not to roll back important environmental and public health programs.
